

EUDA Signs Letter of Intent to Potentially Acquire Chemokine Pte Ltd

Aug 28, 2025

SINGAPORE, Aug. 28, 2025 (GLOBE NEWSWIRE) -- *EUDA Health Holdings Limited* (NASDAQ: EUDA) ("EUDA" or the "Company"), a leading Singapore-based non-invasive healthcare provider in Asia focused on Singapore, Malaysia, and China, today announced that it has signed a Letter of Intent (the "LOI") to potentially acquire Chemokine Pte Ltd ("Chemokine").

EUDA will carry out due diligence on Chemokine, subject to confidentiality obligations. Chemokine has agreed to an exclusivity period of at least one hundred and twenty (120) days during which it shall not engage in any discussions with any other entity relating to any transaction similar to this potential acquisition.

Chemokine is a Singapore based biotech company focused on molecular supplements and gene modulating formulations including, but not limited to, a next-generation immune health supplement it earlier granted EUDA exclusive worldwide distribution rights to, which EUDA and its subsidiaries will market under the brand name, Euda Helixé.

Chemokine was founded by its major shareholder, Professor Kah Meng Lim, a molecular medicine researcher with deep scientific roots. Prof. Lim earned his Ph.D. in Molecular Medicine from the National University of Singapore and spent years in research roles under Singapore's national R&D agency, A*STAR. His work bridges academic science and consumer health innovation, and he is widely respected for translating complex biological discoveries into practical health applications.

What Makes Euda Helixé Different

Euda Helixé is designed to support energy, immune resilience, and cellular health using a formulation that goes beyond traditional supplements. It combines molecular deer placenta, marine collagen and bioactive antioxidants like astaxanthin, L-glutathione, grape seed oil, sea-buckthorn oil and refined avocado oil which it delivers through a capsule system that protects and delivers the ingredients for maximum absorption

Euda Helixé is built on a gene activation model designed to modulate gene expression by activating beneficial genes while silencing harmful ones.
